

A) Research Chemist / Sr. Research Chemist (Process Chemistry R&D)

Job Summary

Position- Research Chemist / Sr. Research Chemist (R&D Synthesis)

Experience: 0-5 Years

Qualification: M.Sc. (Organic Chemistry)

Responsibilities and Duties

- Ensure safety at work place
- Perform the experimentation under the supervision of seniors.
- Collect literature for relevant steps.
- Ensure that laboratory note book (LNB) entries and sample submission are carried out in accordance with the Institute SOPs
- Update the lab chemical list and chemical arrangements periodically.
- Calibration of laboratory instruments such as pH meter, weighing balance etc.

Job Type: Full-time

B) Research Associate (Process Chemistry R&D)

Job Summary

Position-Research Associate (R&D Synthesis)

Experience: 5-8 Years

Qualification: M.Sc. (Organic Chemistry)

Responsibilities and Duties

- Ensure safety at work place
- Conducting the day to day experimentations
- Interpretation of NMR spectra and HPLC chromatograms
- Ensure consistency and repeatability of process to get acceptable yield and quality
- Preparation of project presentation for internal chemistry meeting and maintain research records

Job Type: Full-time

Qualified and interested candidates may submit their curriculum vitae by e-mail to hr@drils.org on or before 15th October 2025.
